WUBU BAMBOO

INCANA

The Bamboo Camp is more than just a workshop. It's a unique, innovative, and transformative experience designed to usher in a new era of sustainable bamboo businesses. This event brings together professionals, entrepreneurs, designers, builders, and visionaries in an immersive experience that transcends construction techniques to explore the true possibilities of a resilient economy based on a renewable, abundant, and strategic resource: bamboo.

In a global context where the climate crisis, resource scarcity, and the need for circular economic models are urgent, Bamboo Camp offers concrete answers. Here, you not only learn to build, but you learn to be a purpose-driven entrepreneur, to lead with a regenerative vision, and to design scalable solutions with real impact.

During several days of intensive interaction, participants gain access to applied knowledge, business strategies, collaborative models, and experiential learning that address legitimate concerns:

- HOW TO START A BAMBOO BUSINESS?

- WHAT BARRIERS EXIST AND HOW CAN THEY BE OVERCOME?

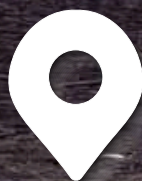

- WHAT IS THE TRUE ECONOMIC POTENTIAL OF THIS MATERIAL?

- HOW TO STAND OUT IN AN EMERGING MARKET?

GUATEMALA

LOCATION
Aldea Buenavista de
Miramar, Livingston,
Izabal

This destination awaits you
with its natural richness and
green spirit.

Learn, create and build with
bamboo in the heart of
Central America.

WUBU BAMBOO

The Bamboo Camp merges design, sustainability, social innovation, and economic empowerment. It is a meeting point between practice and strategy, between the technical and the systemic, where learning becomes action and inspiration transforms into a project.

This event marks a turning point for those seeking to be part of a movement that not only builds structures, but also opportunities, communities, and possible futures. A revolution is brewing around bamboo: greener, fairer, and smarter.

And the Bamboo Camp is the gateway.

FACILITATORS

ARQ. MAURICIO CARDENAS:

A Colombian architect internationally recognized for his work with bamboo and sustainable design. Founder of Studio Cardenas Conscious Design in Milan, he has developed projects such as the Energy Efficient Bamboo House in China and the INBAR Garden Pavilion in Beijing, combining energy efficiency, cement-free structures, and ecological aesthetics. He is a leading figure in regenerative architecture and has received awards for his innovation in conscious design.

JUAN PABLO MARTINEZ

An expert in sustainable rural development with over 15 years of experience in bamboo cultivation, preservation, and construction. Founder of Wübu, he has designed more than eight structures, managed large-scale bamboo nurseries, and organized international bamboo events in Guatemala. He currently advises projects throughout Latin America, combining technical expertise, a regenerative vision, and community leadership.

FACILITATORS

JUAN MIGUEL MARTINEZ

A Guatemalan chef with international training in Culinary Arts and Food Business. A specialist in the use of bamboo shoots, his expertise encompasses everything from planting to cooking, fusing tradition and culinary creativity. With his innovative approach, Miguel transforms bamboo shoots into authentic gastronomic delicacies.

COLLABORATING TEAM

ARQ. MÓNICA SOLANILLA

A Colombian architect with experience in Colombia and Indonesia, she focuses on sustainable design, participatory architecture, and community engagement. She has led housing improvement projects, eco-hotels, and the documentation of vernacular architecture. Trained in bamboo construction at Bamboo U, she promotes ways of living that connect ancestral traditions with contemporary ones.

ARQ. KENDY SEVILLA

A Costa Rican architect with experience in sustainable design and the use of bamboo as a structural and ecological material. She has worked on housing and tourism projects with a regenerative approach, standing out for her team leadership, construction management, and promotion of bamboo as a local resource. She is the founder of the National Bamboo Network in Costa Rica and actively participates in regional sustainability initiatives.

COLLABORATING TEAM

ARQ. SARA PUERTA

A Colombian architect, graduated from the National University, specializing in bioconstruction and sustainable design. She has worked on educational and construction projects using natural materials, prioritizing well-being, inclusion, and a connection with the environment. She is passionate about communicating architecture as a tool for fostering collaborative and conscious processes.

ENERGY EFFICIENT BAMBOO HOUSE
STUDIO CARDENAS CONSCIOUS DESIGN
